

Tuesday Evening, March 13, 1884.

Political Notes.

The Washington and Chester county Democrats have instructed for Samuel J. Randall for President.

The Boston Herald thinks Mr. Randall's nomination a more than probable event.

The Venango county Democrats will present Judge Trumboe as their candidate for President.

NINE-THIRTEEN of the Democrats don't care who the candidate may be, but they want the best and most available.

W. H. SOWDEN, Esq., of Allentown, is a candidate for Delegate-at-Large to the Democratic National Convention, and his friends are making a vigorous for him.

The Democrats of Westmoreland are discussing the question of getting rid of the Crawford county system and going back to delegate conventions.

It is predicted that Hon. Matthew F. Elliott will be renominated for Congress-at-Large unanimously.

TONY SAM, Democrat, known as the encyclopedic author of "Colonel Cash" is thus accounted for. His brilliant powers, however, have been directed to the terrorizing of Democratic leaders, while, from his seat in the white shirt, which floats from "Cash's Den," is not true in the sense that he has been a leader in the movement; but it is true that he has been a leader upon white men who refused to join the democratic in their effort to win South Carolina to his platform standard.

The Republicans, candidates are Arthur Blaine, James Sherman, and others, and then all Blaine enjoys the most enthusiastic favor of a political minority of the party; but if we were nominated the ghost of Madison would lay him low.—N. Y. Sun.

The New York correspondent of the Philadelphia Ledger, who generally "knows" teaches that the reconciliation between Thaddeus and Tannay is complete; that John Kelley and his newspaper approve it.

The Erie Observer believes that the Blaine boom in Pennsylvania will be strengthened in the Harrisburg convention.

A CONFERENCE of dissatisfied Republicans was held on Wednesday in Pittsburgh, at which forty prominent men of the party were present.

The Blaines have carried Quay's county of Beaver.

CLOSER QUAY, Jan. 15.—In good old Pennsylvania appear to be in shadow condition. Somebody seems to have given off with the post holes.—Philip Price.

The President hesitated long before making the Philadelphia Federal appointments, but he finally gave the machine losses all they asked—the consideration delegating to Chicago.

The Wilkesboro Union Leader can't understand the patriotism that commands Longstreet, a rebel general, and a sparse ex-Governor Curtin for following the dictates of his conscience.

The Democratic County Convention to elect delegates to the State Convention will be held in the Court-house next Monday. It is hoped there will be a general turnout to the delegates-electon Saturday, and that the Convention will be a full one.

THINGS have come to a pretty pass among the Republicans of York county. Chairman Schell feels himself called upon to warn the officers of the primaries against frauds. To the Arthur men, four a card from the Blaines?

FITZ JOHN PORTER VINDICATED.—By the decisive vote of 30 to 25 the bill to restore Gen. Fitz John Porter to the army passed the Senate of the Commonwealth, and goes to the President for his signature. It is understood, if it is passed, that the Senate will be in session for a week, and that the bill will be referred to a selected and pre-arranged committee, whose ignorance of the real facts of the case, as supplemented by personal interest, not political bias, is reversed. It is a little known fact that Porter's exclusion from the army had come to be regarded by many good Republicans, whether just or unjust, as one of the "results of the war," and therefore to be sustained at all hazards. So strong was this sentiment that the 32 votes in Porter's favor on Thursday but six were cast by Republican Senators. The passage of the bill vindicates a brave and true soldier whose reputation was clouded by an infamous conspiracy to make him a scapegoat for the blunders of his superiors.

On Friday Gen. Grant sent a telegram of congratulation to Gen. Schenck on the fact of the Porter bill passing the Senate; and a major-general's salute was fired at Utica, N. Y., by members of the 1st Fifth Corps in honor of the same.

THE REPUBLICANS of Allegheny county are in a fight for supremacy over the choice of delegates to the State Convention, and have appointed a committee, including in-law, one member, who lives at Wexford, Pa., and one from Pittsburgh, to represent the district at the meeting.

THE REPUBLICANS of Somerset county are having a lively contest for delegates to the conventions—state and presidential. The Arthur and Blaine crowds have locked horns.

The labor of the Republicans nominally in 1881 brought forth John J. Mitchell, and now it appears that because he was made United States Senator, his son-in-law, one member, who lives at Wexford, Pa., and one from Pittsburgh, to represent the district at the meeting.

HARMON.—Mr. Charles S. Wade is evidently not satisfied with Chamberlain's "harmony." In a recent interview he said:

Republicans, with Quay, Maguire, Cooper and Leeks in command is not the reformed and harmonized Republican to whom he refers. Such reform has been bought and sold by the public school of submission.

McKEE, chairman of the independent, believes that Blaine would definitely nominate him.

THE North Carolinians discern that the Blaine managers are endeavoring to be too easily implanted of their "old horse," who turns out to be "the old gray mare."

THE Philadelphia Times celebrated its tenth anniversary on Thursday by issuing a mammoth paper of 24 pages, the largest and handsomest ever printed in that city. The enterprise of the Times is already supreme.

SALISBURY recommended on the Delineator on Monday, and quite a number are being copied.

ONSA DIGNA was again defeated by Gen. Graham on Thursday, the British loss being 75 killed and 100 wounded and that of the enemy over 2,000.

South Carolina Disparagement.
The "southern outrage," column of the Republican papers have been silent for several weeks. This reason is not hard to find. Two of their leaders in South Carolina, Col. Cash and son, prove to be bloody desperadoes, and the latter guilty of a series of a most atrocious murder. A third, heavily armed, has been offered for his services, but he has taken to the signs and thus eluded capture. The *Hartington Patriot* remarks:

Cash, the South Carolina murderer, is the leader of the "rebellion" party in the Palmetto state. He holds the same relation to the other party in South Carolina that Mathew Brady does in Virginia. In his own immediate neighborhood he has presented the "shotgun policy" with a vigor worthy of that other emblem in the Democratic party, Clinches, or Mississippi.

The singular silence of the Republicans concerning the politics of "Colonel Cash" is thus accounted for. His brilliant powers, however, have directed to the terrorizing of Democratic leaders, while, from his seat in the white shirt, which floats from "Cash's Den," is not true in the sense that he has been a leader in the movement; but it is true that he has been a leader upon white men who refused to join the democratic in their effort to win South Carolina to his platform standard.

The Republicans, candidates are Arthur Blaine, James Sherman, and others, and then all Blaine enjoys the most enthusiastic favor of a political minority of the party; but if we were nominated the ghost of Madison would lay him low.—N. Y. Sun.

DREADFUL MINING DISASTER.
One Hundred and Fifty-five Men
Killed by an Explosion.

PIRAGHOMA, Va., March 13.—A large gas explosion occurred at Lodeback this morning in the Laurel Creek mine, operated by the South-West Mining Company in this place.

EVERY MAN KILLED.

Wm. B. MILLER has

now in connection with his Marble head, in the coal fields of West Virginia, the

most dangerous and

deadly work.

WILLIAM B. MILLER, 35, a

native of Marion, W. Va.,

was killed in the

explosion at Lodeback.

He was working in

the mine when the

explosion occurred.

He was working in

the mine when the

explosion occurred.</

the election of my FRIENDS,
they can be re-elected
and I hope they will be.

Tuesday Evening, March 18, 1884.

N. Y. RURAL RICHEITIES.

Can your wife make good bread from poor flour?

Sagittate water—the bane of plant life, the ally of malaria.

All seasons of the year see that the dollars are pure and sweet now.

A penny wise and a pound foolish; to use manure or fertilizers in the hill.

Have you a place suitable for water-cresses? The market price is always remunerative.

The late freeze damaged winter oats 60 per cent, and wheat 50 per cent, in Georgia.

Price & Knickerbocker say that the Sunrise Potato is "fit for the table in 50 days after planting."

The Kansas U. I. College students are very fond of "buckwheat cakes" made out of sorghum-seed flour.

Don't linger. When you work, work!

When you play play! Why not do the one as well as the other, with a zest?

If you can't eat new plants or seeds in a small plot, as well as in a field, why not do so? You learn just as much and run no risk of loss.

Mr. Leander Wettengel thinks that an oak, elm, or maple tree shading a most strolling makes it more attractive than a showy summer unpeeled by a tree.

Were the five horses of Mr. Bronson of Conn., killed by lightning? He thinks that the asetic fermentation caused a paralysis of the brain and nervous system.

The Poultry World makes a note that the Plymouth Rocks are probably the most perfectly adapted to all climates and localities of any of the modern varieties of standard fowls.

All the most trustworthy experience has shown, that in the long run, commercial measures do their best and surest work in association with stable management, says Dr. Caldwell in the New York Tribune.

Mr. E. B. Underhill ends his small trifling thus: "Always pay to a man who deserves it." But, uncle, suppose I have nothing to pay?" "Then don't go."

It is all very well to talk of staking tomato plants. They do look more neat and trim. But it doesn't pay, and all those who have fully tried both methods know it.

Mrs. Purdy prizes the Jumbo Strawberry because of its extreme lateness, enormous and uniform size, "running from five to eight inches in circumference," she says, "and holding out longer than the last picking."

If you have any spare land, with no prospect of its being put to remunerative use, suppose you plant a few forest trees. It will pay, even if you don't live to see the day of the golden harvest, yet the earliest fruits to market.

The potato specialists of Schenectady, Washington, Saratoga, and Rensselaer counties, N. Y., are likely to lose about half-million dollars on potatoes this season. There is now a glut in this market and thousands of bushels and endongs shipped by them during the past few months, in expectation of a rise in price, remain mould.

Owing to the low prices this year, most likely to be planted during the current year, and this will probably occasion great price next season.

We know no advice better or more profitable than this, viz.: Study your market. The time of planting is about at hand, and the question is, what shall I plant? If you wish to make money, don't plant potatoes, cabbages, or whatever it may be, simply because all your neighbors are doing so. It is the very reason why you should not. Plant something which seems likelihood to have a demand; something of which you can monopolize the market. This is the best advice, but as good as Government bonds.

There has been started in Berlin a "share company for the removal of trichina in pork." A patient is being applied for on a recently invented process to effect, roasting of pickling brine by means of a highly heated heat, in which nitrate and soda form a large ingredient, which process, it is claimed, will kill any trichina that may be in the meat, and preserve the latter permanent.

Which are the best and most desirable varieties of grapes for home use and general culture—two black, two red, two white—quality, hardness, and general healthiness considered? This question was voted upon by the members of the New Jersey State Horticultural Society with the following result: Black Concord, Western, Red-Brighton, Jefferson, Atlantic, Rockingham, Dutchess.

One of the best tonics for poultry is that known as the Douglas mixture, composed of one ounce sulphuric acid, one pound copperas and eight quarts of water. Put a tablespoonful of the solution in a six-quart dressing vessel. To boiling water, add the combs, and boil for three hours.

We hope that due to many of our friends will send us specimens of the tomatoes, peans, beans, flowers, oats, and corn which they raise, and that they will write us of their success or failure and to what it was due.

CATTLE FEEDING.—Some weeks ago we published the increase in weight, for the month of January, of 33 cattle which Mr. John N. Sock's is feeding on the farm of Elton Edward McPherson. They are weighed at noon on the first of each month, not having had water for 21 hours. Mr. Sock's reports the result of the weighing on the 14th inst. The total gain in weight in the month of February, and it is a short month, was 2,011 lbs., or an average of nearly 73 lbs. to each steer. One steer gained 50 and another 110 lbs.; six gained between 50 and 100 lbs.; seven gained over 80 lbs.; five over 100 lbs., and eight gained over 50 lbs. The gains of the remaining five were from 10 to the lowest, to 50, the highest. The average weight of each steer is 1,207 lbs.

OVER the barrels of mousiness on the New Orleans levee go men in couples, with a mallet, the other with a long wooden paddle. The man with a mallet hammers away until the lung springs out. Then his companion drives his paddle in the hole and throws out half a gallon of mousiness of the barrel. He tastes it carefully, grades it, and the lung is replaced. The mousiness thrown out drops down on a corrugated floor, shouting to a common central trough, in which all the refuse settles. Every effort is made to clean up the trough, but the refuse is like delectable substances, flows. Once a week the troughs and receivers are cleaned out. The refuse mousiness is run to barrels and sold to dealers, who put it through a process which removes the foreign substances and keeps the mousiness as clear looking as ever. The whole amount of this kind of mousiness put in the market annually is about one thousand thousand.

THE HIGHWAYS.

A correspondent of the County Herald makes the following timely remarks:

"Let any one drive over most American roads in the spring, with open eyes and ears, and see what unchecked destruction it is work—steers are running in the tracks that the removal of a road would not leave. An army of tens of all nations, surely some tens of thousands, have laid waste the roads, and the people are impotent. For by care this tobacco has been taken, and the roads are ruined. During the civil war, regular, the command for

new contributions were issued, and the soldiers were told it was the duty of the Bull.

"The last word is that where the Bull is dead, the roads are to be repaired. Smoking Tobacco is bad."
